THIS WEEK'S TOPIC

AI Basics for Real Estate Agents

Free tools, paid tools, and prompts you can use today

Thu 11/5 · 5:00 PM · Zoom

FLR EDUCATION

Zoom Session

HOSTED BY

Scott Barrett

FLORIDA Luxury REALTY

LET'S START HERE

Everyone is talking about AI. Chatbots, agents, connectors, skills.

What can it do for your business today?

By the end of this hour you will have a free tool, a few prompts and a plan.

TODAY'S PLAN

What we'll cover

01

Start free

Generative AI with a free account.

02

Go further

Agentic AI with a paid account.

03

Connect it

Connectors, skills and why they matter.

04

Free prompts

Prompts to use for your business today.

Four leading AI assistants

OPENAI

ChatGPT

The most widely known.

ANTHROPIC

Claude

Strong at writing and documents.

GOOGLE

Gemini

Works with Gmail, Drive and Calendar.

XAI

Grok

Connected to the X platform.

Today every one of them can do both generative and agentic work.

Where each one tends to shine

CHATGPT

Everyday all-rounder

Natural-sounding writing, voice and photo input, and a large app ecosystem.

CLAUDE

Long documents

Careful writing and reasoning, handles very long files and builds documents and pages.

GEMINI

Your Google world

Works with Gmail, Drive, Calendar and Android, and is strong at current-information research.

GROK

Live and social

Real-time information and X data, fast conversational answers.

Reviewer-reported tendencies that change often. Test each with your own prompt.

Generative AI and agentic AI

GENERATIVE

Creates content

You ask, it writes or draws. A listing description, a social post, a flyer, an email reply.

AGENTIC

Does the work

You give it a goal. It takes steps, uses your apps, and checks its work before it hands it back.

Generative answers. Agentic acts. Most agents start generative and grow into agentic.

PART 1 · THE BIG PICTURE

Choosing your first tool

LIVE IN GOOGLE?

Start with Gemini

It works with the Gmail, Drive and Calendar you already use.

ALREADY USE ONE?

Stay with it

Learn one tool well before you try another.

NOT SURE?

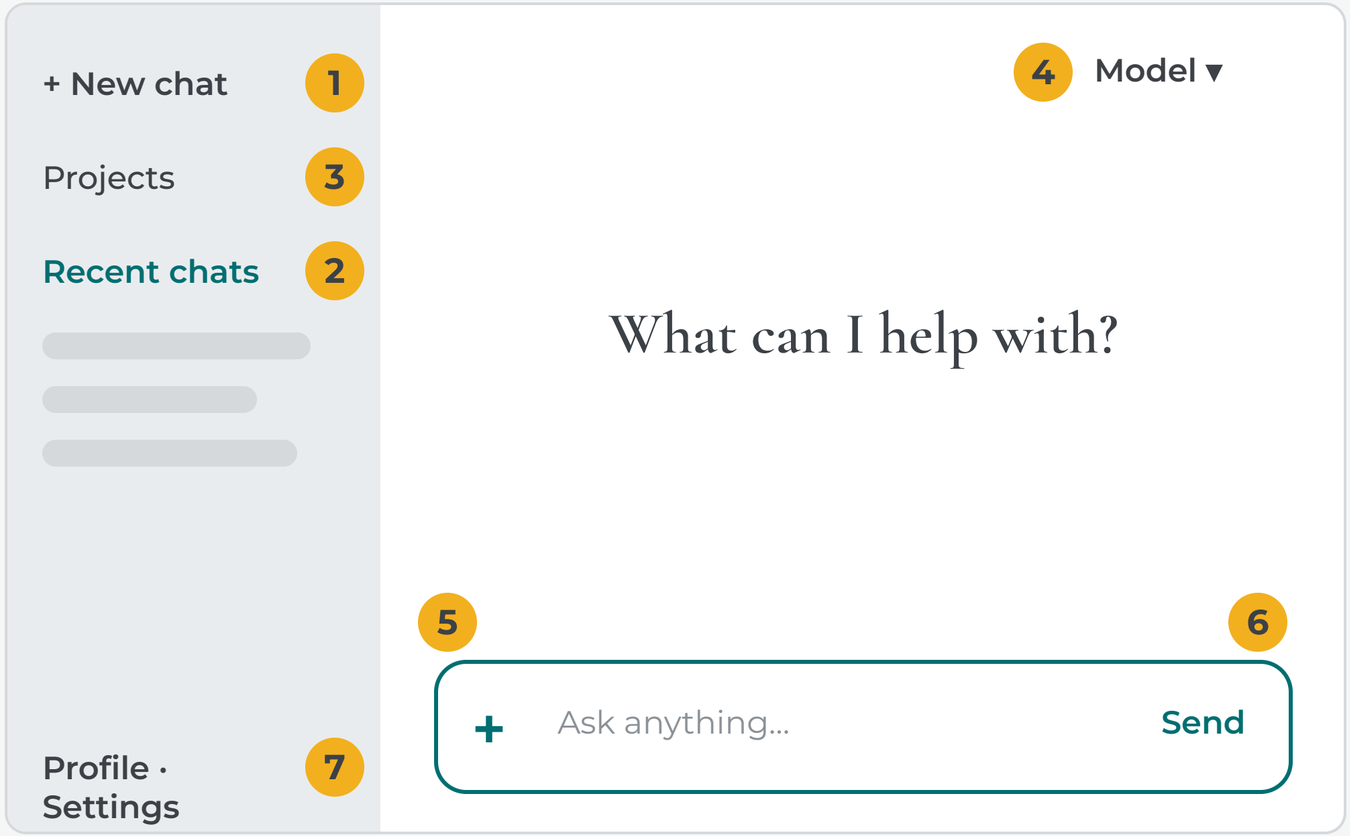

Compare two

Run the same prompt in two free tools and keep the one you like.

The skills you learn work in every tool.

PART 2 · START FREE

Finding your way around any AI app

1. **New chat**
   Start fresh for each new job
2. **Chat history**
   Find and reopen past chats
3. **Projects or saved assistants**
   Keep files and instructions together
4. **Model picker**
   Choose faster or more capable
5. **Attach (+)**
   Add photos, files or connected apps
6. **Prompt box**
   Type or speak your request
7. **Profile and settings**
   Plans, memory and connectors

PART 2 · START FREE

Generative AI with a free account

1

Create an account

Sign up for free with your email or an existing account.

2

Type a clear request

Say what you want, for whom and how it should sound.

3

Review and edit

Read it, fix the facts and make it sound like you.

Free plans have usage limits and fewer features, and they change often.

PART 2 · START FREE

Four words to know

PROMPT

Your instruction

The clearer the prompt, the better the result.

CHAT

One conversation

It remembers what was said inside that chat. Start a new chat for a new job.

HALLUCINATION

A confident wrong answer

AI can state something false in a convincing way. Check facts.

CONTEXT WINDOW

What it can hold in mind

Very long chats can lose earlier details.

PART 2 · START FREE

Chats and memory

INSIDE ONE CHAT

It remembers

Everything you said earlier in that chat, so you can say “make it shorter” or “now do the second one”.

A NEW CHAT

It starts blank

It does not know your name, market or brand unless a memory feature or file tells it.

A PROFILE FILE

It carries over

A short document about you and your business that you give to every new chat.

Keep one chat per job. Start a new chat for a new job, and hand it your profile file.

PART 2 · START FREE

What goes in your profile file

About you

Name, brokerage, license type, years in business and a two-line bio.

Your market

Cities, neighborhoods and the clients you serve best.

Brand colors

Hex codes, like #016E71 teal and #F2B01E gold.

Logo and fonts

Which logo file you use and your brand fonts.

Voice and tone

Warm, direct, formal? Add a sample of your writing.

Rules

Standard disclaimers, Fair Housing, and words to never use.

Leave out client names and private details.

PART 2 · START FREE

Create your profile file in four steps

1

Let the AI interview you

Ask it to question you one at a time.

2

Save the result

Keep it as a one-page document.

3

Put it where it sticks

Memory, a project, saved instructions, or paste it.

4

Refresh it

Update it when your brand or goals change.

TRY THIS PROMPT

“Interview me one question at a time to build a one-page profile I can reuse: my name, brokerage, market, ideal clients, brand colors and logo, voice and tone, and what to never say. Then write it as a clean document I can paste into any new chat.”

PART 2 · START FREE

Step 1 · Let the AI interview you

PASTE THIS IN A NEW CHAT

“I want to build a one-page profile of me and my real estate business that I can reuse in any AI chat. Interview me one question at a time. Cover who I am, my market, my ideal clients, my brand colors, fonts and logo, my writing voice, and what you should never say. When we finish, write it as a clean one-page document.”

EXPECT QUESTIONS LIKE

- What is your name, brokerage and license?
- Which areas and clients do you serve?
- What are your brand colors and fonts?
- How would a friend describe how you write?

PART 2 · START FREE

Step 2 · Review and save the result

SAMPLE PROFILE · ABOUT ME AND MY BUSINESS

About Jordan Lee, Example Realty, Florida licensed agent since 2019.

Market Pasco and Hillsborough. First-time buyers and downsizers.

Brand Teal, charcoal and gold. Cormorant Garamond headings, Montserrat body. Logo attached.

Voice Warm, plain English, short sentences.

Rules Fair Housing safe. No client names. Include my license line.

Teal #016E71

Charcoal #3C4147

Gold #F2B01E

The AI reads color codes and font names. It cannot see your logo unless you attach the file.

STEP 3 · MENUS CHANGE, CHECK YOURS

Where your profile file lives

ChatGPT	**Personalization** menu: Custom instructions and Memory. Per job: **Projects** in the sidebar.
Claude	**Settings** → **Your Claude**: Instructions. **Settings** → **Memory**. Per job: **Projects**.
Gemini	**Settings** → **Personal context** → **Add**. Per job: **Gems**, custom assistants.
Grok	**Settings** → **Data Controls** for memory. Or paste your profile at the top of a chat.

PART 2 · START FREE

Step 4 · Test it and keep it fresh

1

Open a new chat

Attach or paste your profile, plus your logo if you need images.

2

Give it a real task

“Using my profile, write three social posts for my newest listing.”

3

Check and fix

Do the colors, voice and rules match? Edit the file, not the chat.

4

Refresh it

Update after a rebrand, a new market or a new goal.

Keep the master copy in your own Drive so it works in any tool.

PART 2 · START FREE

A simple prompt formula

Goal
What you want made

Context
Property, market and client

Details
Features and facts to include

Format
Length and shape

Tone
How it should sound

Then ask: “What else do you need to know?” Let the AI ask you questions first.

USE IT WELL

Three rules for agents

01

Protect client information

Leave out names, Social Security numbers and financial details. Follow brokerage policy.

02

Check every fact

Verify prices, dates, laws and numbers before they reach a client. You are responsible for what you send.

03

Follow Fair Housing

Describe the home, not who it is “perfect for”. Review every listing description.

PART 3 · GO FURTHER WITH PAID

What a paid account typically adds

MORE USAGE

Fewer limits

More messages and longer sessions.

STRONGER MODELS

Better thinking

Access to the most capable versions.

YOUR FILES

Work with documents

Upload files and have them analyzed.

AGENTIC TASKS

Multi-step work

Tools that take steps for you.

Plans and names differ by tool and change often. Check before you buy.

PART 3 · GO FURTHER WITH PAID

What an AI agent can do for you

LEADS

Follow up

Reads your new leads, drafts a message for each and queues them for your review.

LISTINGS

Prepare an appointment

Gathers the facts, drafts talking points and builds a presentation outline.

YOUR DAY

Manage inbox and calendar

Summarizes email, finds open times and prepares you for showings.

You stay in charge. Review everything before anything is sent.

PART 4 · CONNECTORS AND SKILLS

What makes AI useful for your business

CONNECTORS

Links to your apps

With your permission, the AI can reach tools like email, calendar, files and your CRM.

SKILLS

Your way, saved

Saved instructions for a job you repeat. Tools call them skills, custom GPTs, Gems or projects.

FINISHED FILES

Beside the chat

Flyers, pages, documents and decks the AI builds for you to edit, share or download.

A few more words you will hear

ADD-ONS

Plugins and apps

Extras that give the AI new abilities.

MCP

A shared standard

Model Context Protocol, a common way for AI tools to connect to apps.

MEMORY

Remembers you

Saved details like your market and style, so you repeat less.

WEB SEARCH

Looks things up

Finds current facts instead of relying on what it learned.

PART 4 · CONNECTORS AND SKILLS

Why connectors and skills matter

Time back

Repeat jobs take minutes, not hours.

Your voice every time

Saved instructions keep messages sounding like you.

Your information ready

Connected apps mean less copy and paste.

How to create a skill

1
Pick one job
Choose something you repeat, like a listing follow-up.

2
Say how you do it
Explain the steps, your voice and a good example.

3
Let the AI build it
It turns your answers into a reusable instruction.

4
Test it
Run it on a real job and note what to change.

5
Improve and reuse
Adjust it, save it and use it again.

Just say: “Help me create a reusable instruction for [the job].” The AI asks the questions.

How a skill uses your apps

THE SKILL

Knows how

Your steps, your voice and your examples.

THE CONNECTOR

Reaches your apps

Reads and uses your CRM, email, calendar or files.

THE RESULT

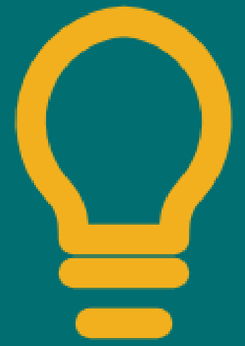

Finished work

A drafted email, a flyer, a plan you review.

Example: “Follow up on my new leads” reads the leads, writes each message your way and saves drafts for your review.

PART 5 · FREE PROMPTS FOR TODAY

Five prompts to try for free

1. Listing description
2. Social media content
3. Flyer wording and layout
4. 90-day business plan
5. One more from your own week

FREE PROMPT 1 · LISTING DESCRIPTION

Write a listing description

TRY THIS PROMPT

“Write a listing description for [address]: [beds, baths, square feet], [updates and features], [neighborhood highlights]. Warm and specific, under 150 words, no exaggeration and no wording about who the home is for. Give me two versions.”

- Give real facts and updates
- Ask for two versions
- Remove “perfect for…” language

FREE PROMPT 2 · SOCIAL MEDIA

Create a week of social content

TRY THIS PROMPT

“Create five social posts for [city or neighborhood], mixing buyer and seller topics: a market tip, a local favorite, a common client question answered, a just-listed post and a friendly call to action. Two or three sentences each, in a warm, professional voice, with three hashtags.”

- Name your market
- Mix buyers and sellers
- Ask for a Google Business version

FREE PROMPT 3 · FLYER

Plan an open house flyer

TRY THIS PROMPT

“Write the text and layout for a one-page flyer for my open house at [address] on [date and time]: a headline, three highlights, my name and phone number, and a call to action. Suggest colors and where the photo should go. Clean and modern.”

- Ask for wording and layout
- Finish it in a design tool you already use
- Check every date and detail

FREE PROMPT 4 · BUSINESS PLAN

Build a 90-day business plan

TRY THIS PROMPT

“Act as a business coach for a Florida real estate agent. Last year I closed [number] sides and I want [goal]. Ask me five questions first. Then build a 90-day plan with weekly lead-generation actions, a follow-up routine and a simple tracker.”

- Share last year’s results
- State one clear goal
- Ask it to question you first

PART 5 · FREE PROMPTS FOR TODAY

More free prompts to try

Open house follow-up

A friendly message to every visitor.

Reply in your voice

Draft answers to client emails.

Seller update

A clear weekly update with showings and feedback.

Objection scripts

Practice answers to “your fee is too high”.

Neighborhood guide

A one-page guide for your farm area.

Plan your day

Turn your to-dos into a time-blocked day.

Your first week

TODAY

Pick one free tool

Run the listing description prompt on a real listing.

THIS WEEK

Try three more

Run the social, flyer and planning prompts. Save the ones you like.

THIS MONTH

Decide what is next

See whether a paid plan or connected apps would save you time.

YOUR TURN

Bring a real task.

- What do you do every week that takes too much time?
- Which AI tool do you already use, and what for?
- What worries you most about using AI?

COMING UP NEXT

Growing Your Business Through the Holidays

WHAT TO EXPECT

Scripts and objection handlers for helping sellers feel confident about listing during the holidays, plus simple ways to wish your database happy holidays without a sales pitch.

IN PERSON

Wed 11/18

11:00 AM – 12:30 PM · Port Richey

ON ZOOM

Thu 11/19

5:00 – 6:00 PM

HYNRI HIGHLIGHT

Did you know? Hynri can...

Put all of this to work for you, with no building from scratch.

Hynri is the AI partner your FLR agent skills run on, provided by Hynri LLC, a separate company.

DID YOU KNOW? HYNRI CAN…

hynri

Be your AI partner, already set up

Skills and connections built for real estate, set up for you.

HOW IT HELPS YOU

You start with tools made for agents instead of building every skill yourself.

Next step: ask Scott about the hands-on setup workshop.

Your Success Is My Mission!

ONE ACTION THIS WEEK

Run the listing description prompt on one real listing.

Thank you for being here.

Questions and open discussion
