THIS WEEK'S TOPIC

Basics of AI for Real Estate Agents

The terms, the tools and your first five tasks

Thu 11/5 · 5:00 PM · Zoom

FLR EDUCATION

Zoom Session

HOSTED BY

Scott Barrett

FLORIDA Luxury REALTY

LET'S START HERE

Everyone is talking about AI. Chatbot, agent, connector, skill.

What does it all mean for your business?

By the end of this hour you will have the words and a plan.

TODAY'S PLAN

What we'll cover

01

The big idea

Generative AI and agentic AI, and why the difference matters.

02

ChatGPT and Gemini

Where each one fits, including Google accounts.

03

Claude

Its words, how skills work and where you use it.

04

Start this week

Five easy tasks and the prompts to run them.

PART 1 · THE BIG IDEA

Generative AI and agentic AI

GENERATIVE

Creates content

You ask, it writes or draws. A listing description, a social post, a flyer, an email reply.

AGENTIC

Does the work

You give it a goal. It takes steps, uses your apps, and checks its work before it hands it back.

Generative answers. Agentic acts. Most agents start with generative and grow into agentic.

PART 2 · THE TOOLS

ChatGPT, Gemini and Claude

CHATGPT

Strong for generating

Writing, brainstorming, images and quick answers. A friendly place to practice prompts.

GEMINI

Inside your Google account

Works with Gmail, Drive, Calendar and Docs: summarize threads, find files, prep for your day.

CLAUDE

Builds and does the work

Connectors, skills, artifacts and projects for repeatable, multi-step jobs.

Pick one main tool and learn it well. Use a second where it fits your day.

PART 2 · THE TOOLS

If you live in Google

GMAIL

Inbox help

Summarize long threads and draft replies you edit.

DRIVE

Find and summarize

Locate a file or summarize a long document.

CALENDAR

Plan your day

Check your schedule and get ready for showings.

If your business already runs in Google, start with Gemini inside those apps.

The everyday words

PROMPT

The instruction you give

The clearer the prompt, the better the result. Say who it is for, what you want and how it should sound.

CHAT

One conversation

Claude remembers what was said inside a chat. Start a new chat for a new job.

PROJECT

A workspace for one topic

Keeps your files, instructions and chats together, like a folder for “My listings” or “My business plan”.

What makes it useful

CONNECTORS

Links to your apps

With your permission, Claude can reach tools like Google Drive, Gmail and Calendar.

SKILLS

Your way, saved

A saved set of instructions for a job you repeat, so it is done your way every time.

ARTIFACTS

The finished thing

Flyers, pages, documents and decks Claude builds beside the chat. Edit, share or download.

Going further

PLUGINS

Bundles

Skills and connectors packaged together for a role or a job.

MCP

The common plug

Short for Model Context Protocol, a standard way for AI to connect to apps. Connectors are built on it.

DISPATCH

Assign from your phone

Send Claude a task from your phone and it works on your computer.

DESIGN

Visual work

Claude Design builds flyers, graphics and layouts you can keep editing.

More words you will hear

HALLUCINATION

A confident wrong answer

AI can state something false in a convincing way. Always check facts.

CONTEXT WINDOW

What it can hold in mind

How much text it can work with at once. Long chats can lose details.

WEB SEARCH

Looking things up

The AI searches the web for current facts instead of relying on memory.

MEMORY

Remembering you

Saved details, like your market and style, so you repeat less.

How to create a skill

1
Pick one job
Choose something you repeat, like a listing follow-up.

2
Say how you do it
Explain the steps, your voice and a good example.

3
Claude builds it
It turns your answers into a skill.

4
Test it
Run it on a real job and note what to change.

5
Improve and reuse
Adjust it, save it and use it again.

You can simply say: “Help me create a skill for [the job].” Claude asks the questions.

How a skill uses your apps

THE SKILL

Knows how

Your steps, your voice and your examples.

THE CONNECTOR

Reaches your apps

Reads and uses your CRM, email, calendar or files.

THE RESULT

Finished work

A drafted email, a flyer, a plan you review.

Example: “Follow up on my new leads” reads the leads, writes each message your way and saves drafts for your review.

Where you use Claude

Where	Best for	Good to know
claude.ai on the web	Chat, projects, artifacts and connectors from any browser	Nothing to install
Claude desktop app	Everything on the web, plus your computer’s files and longer tasks	Works with Dispatch
Claude in Chrome	Working inside websites you are signed in to	Review before it submits
Claude mobile app	Chat, voice and photos on the go	Assign tasks to your desktop

USE IT WELL

Three rules for agents

01

Protect client information

Leave out names, Social Security numbers and financial details. Follow brokerage policy.

02

Check every fact

Verify prices, dates, laws and numbers before they reach a client. You are responsible for what you send.

03

Follow Fair Housing

Describe the home, not who it is “perfect for”. Review every listing description.

PART 4 · START THIS WEEK

Five easy first tasks

1. Listing description
2. Social media content
3. Flyer design
4. Business plan
5. One more from your own week

PART 4 · START THIS WEEK

A simple prompt formula

Goal
What you want made

Context
Property, market and client

Details
Features and facts to include

Format
Length and shape

Tone
How it should sound

Then ask: “What else do you need to know?” Let the AI ask you questions first.

TASK 1 · LISTING DESCRIPTION

Write a listing description

TRY THIS PROMPT

“Write a listing description for [address]: [beds, baths, square feet], [updates and features], [neighborhood highlights]. Warm and specific, under 150 words, no exaggeration and no wording about who the home is for. Give me two versions.”

- Give real facts and updates
- Ask for two versions
- Remove “perfect for…” language

TASK 2 · SOCIAL MEDIA

Create a week of social content

TRY THIS PROMPT

“Create five social posts for [city or neighborhood], mixing buyer and seller topics: a market tip, a local favorite, a common client question answered, a just-listed post and a friendly call to action. Two or three sentences each, in a warm, professional voice, with three hashtags.”

- Name your market
- Mix buyers and sellers
- Ask for a Google Business version

TASK 3 · FLYER DESIGN

Design an open house flyer

TRY THIS PROMPT

“Design a one-page flyer for my open house at [address] on [date and time]. Use my colors [colors]. Include space for a main photo, three highlights, my name, phone and logo, and a QR code placeholder. Clean and modern.”

- Share your colors and logo
- Ask for a page you can edit
- Add your contact details

TASK 4 · BUSINESS PLAN

Build a 90-day business plan

TRY THIS PROMPT

“Act as a business coach for a Florida real estate agent. Last year I closed [number] sides and I want [goal]. Ask me five questions first. Then build a 90-day plan with weekly lead-generation actions, a follow-up routine and a simple tracker.”

- Share last year’s results
- State one clear goal
- Ask it to question you first

PART 4 · START THIS WEEK

More easy wins

Open house follow-up

A friendly message to every visitor.

Reply in your voice

Draft answers to client emails.

Seller update

A clear weekly update with showings and feedback.

Objection scripts

Practice answers to “your fee is too high”.

Neighborhood guide

A one-page guide for your farm area.

Plan your day

Turn your to-dos into a time-blocked day.

PART 4 · START THIS WEEK

Your first week

TODAY

Start small

Open the tool you will use most and run the listing description prompt.

THIS WEEK

Try three

Run the social, flyer and planning prompts. Save what works in a project.

THIS MONTH

Connect and save

Connect your Google apps and turn one repeat job into a skill.

YOUR TURN

Bring a real task.

What do you do every week that takes too much time?

Which AI tool do you already use, and what for?

What worries you most about using AI?

COMING UP NEXT

Growing Your Business Through the Holidays

WHAT TO EXPECT

Scripts and objection handlers for helping sellers feel confident about listing during the holidays, plus simple ways to wish your database happy holidays without a sales pitch.

IN PERSON

Wed 11/18

11:00 AM – 12:30 PM · Port Richey

ON ZOOM

Thu 11/19

5:00 – 6:00 PM

HYNRI HIGHLIGHT

Did you know? Hynri can...

Put all of this to work for you, with no building from scratch.

Hynri is the AI partner your FLR agent skills run on, provided by Hynri LLC, a separate company.

DID YOU KNOW? HYNRI CAN…

hynri

Be your AI partner, already set up

Skills and connectors built for real estate, running in your own Claude account.

HOW IT HELPS YOU

You start with tools made for agents instead of building every skill yourself.

Next step: ask Scott about the hands-on setup workshop.

Your Success Is My Mission!

ONE ACTION THIS WEEK

Run the listing description prompt on one real listing.

Thank you for being here.

Questions and open discussion
